Great Progress OF THE Fisher's Pianos

From a small beginning the Fisher Piano has grown to be not only one of the best known pianos made, but its sale has reached a point where it is nearly double that of any piano manufactured in this or any other country. All this has been accomplished, practically speaking, within the past ten years. Not only this, but it has received the highest testimonials from many of the greatest vocalists and pianists that the world has ever produced. It is in daily use in leading schools and colleges everywhere, and has received highest rewards wherever publicly exhibited.—Chicago Indicator.

We sell the Fisher Pianos, also Decker Bros. and Weber Pianos, Story & Clark and Chicago Cottage Organs, and several other fine makes.

POLLITZ TALKS OF THE MARKET The Stockbroker Says Only Speculative Coin is Tight.

The arrival of Edward Pollitz, the San Francisco stock broker, on the steamer Alameda yesterday, was an occasion of especial interest to brokers, bankers and plantation agencies. One of his first statements upon landing was that the local financial market has been over speculative and had gone into stock buying to a much greater extent than they can maintain. He stated his knowledge of the yield of the crops which was up to the estimates made. Although the financier told not the object of his visit to Honolulu, it is thought that he comes to effect a general pooling of many of the shares of the best dividend paying plantations on the plan outlined by Col. George W. Macfarlane in an interview upon the subject a few weeks since. This plan was to pool the plantation stocks, forming them into a general combination to be controlled by the Seligman's at New York City, who will act as sponsors when the shares are listed on the stock boards of New York. Col. Macfarlane stated his belief that Mr. Pollitz would endeavor to carry this arrangement here, having been successful in his plans with the banking house to that end. It is Broker Pollitz's contention that money for speculative purposes only is tight. For general long investments he feels certain that the money is forthcoming. Money on the Mainland is easy, that of San Francisco being loaned out at present at four per cent. He states that the only way to relieve the Honolulu stock market is to allow the shares to be listed on the New York and London boards.
